| Keywords: | internal communication, collaborative teamwork, mailing lists, website |
| Description: | The deliverable includes information on the communication infrastructure of the project, the project website, mailing lists, data exchange and net meetings. |

# Executive Summary

The deliverable includes information on the communication infrastructure of the project, setup to suit the diverse and demanding communication needs, exchange of ideas and data, and the related management of the knowledge and software components.

Reference is being made to  channels of communication (working groups, mailing lists and net meetings) as well as the data exchange and collaborative team working infrastructure with respect to all aspects of collaborative brainstorming and exchange of ideas, collaborative writing and management of collaborative software development. Last but not least, the project's website as a mechanism of communication and outcomes promotion to individuals, research groups, end users and the industry is being considered.
